

Senior Consultant

Duties:

Responsible for providing consulting services for core infrastructure projects, including server and desktop virtualization (HyperV, VMware, Citrix), storage area networks and Microsoft infrastructure related applications (Exchange, Active Directory, SharePoint, System Center). This includes architecting, designing, and configuring technical solutions for customer requirements. Perform on-site client work for installations and long-term support contracts. Assist with the ordering process of all infrastructure related hardware and software.

Education/Experience:

Bachelor's degree in an IT related discipline required with 5-7 years of related experience, including 2-3 years experience in the following:

- VMware, HyperV, Citrix
- SAN
- MS Exchange
- Directory service (Active Directory or LDAP)
- MS Windows networking and system administration
- Unix or Linux system administration in Enterprise environment
- TCP/IP networking
- Web server administration: MS IIS and/or Apache

Experience in the following areas are highly desired:

- Database administration on Oracle and/or MS SQL Server
