

Consultant - Infrastructure

Duties:

Responsible for providing consulting services for core IT infrastructure and cloud-based projects, including server and desktop virtualization (VMware, Hyper-V, Azure, Citrix), storage area networks, and Microsoft infrastructure related applications (Exchange, Active Directory, and Office 365). This includes architecting, designing, and configuring technical solutions for customer requirements. Performs on-site client work for installations and long-term support contracts. Assists with the ordering process of all infrastructure related hardware and software.

Education/Experience:

- Requires Bachelor's degree in an IT related discipline, with 3-4 years of related experience, including 1-2 years of experience in the following:
 - Hardware virtualization (VMWare, Horizon 7/8, Hyper-V, Citrix)
 - Directory services (Active Directory or LDAP)
 - MS Windows networking and systems administration
 - TCP/IP networking
 - Microsoft 365
 - Basic knowledge of Windows Azure
 - Unix or Linux system administration in Enterprise environment
 - Web server administration: MS IIS and/or Apache web services
 - Administration of Windows Server 2008+
- Experience with VMware Horizon 7/8 is highly desirable.
- Equivalent combination of education, training and experience will be considered.
